

Use-Case Flow Specifications

Name : Rishab Naveen

SRN : PES1UG24CS710

Preconditions

1. The developer is authenticated in the system.
2. The developer has logged time against one or more project tasks.
3. The timesheet period is open for submission.
4. Total logged hours do not exceed the permitted daily limit.

Postconditions

1. The timesheet is successfully submitted.
2. The system validates the timesheet data.
3. The timesheet status is updated to Pending Approval.
4. The Engineering Manager is notified that a timesheet requires review.

Main Success Scenario

1. The Remote Developer logs into the system.
2. The developer selects the current timesheet period.
3. The developer reviews logged hours for project tasks.
4. The developer clicks Submit Timesheet.
5. The system validates the timesheet entries.
6. The system confirms that the total hours are within the allowed limits.
7. The system records the submission.
8. The system updates the timesheet status to Pending Approval.
9. The system notifies the Engineering Manager.
10. The developer receives a confirmation message that the timesheet has been submitted successfully.

Alternate Flow A1 – Validation Failure

1. The Remote Developer clicks **Submit Timesheet**.
2. The system validates the timesheet entries.
3. The system detects that the submitted hours exceed the maximum allowed daily limit or contain invalid data.
4. The system rejects the submission.
5. An error message describing the validation issue is displayed.
6. The developer corrects the timesheet information.
7. The developer resubmits the timesheet.
